

# ZK-M20

## Portable video under vehicle inspection

The Portable video under vehicle inspection is mainly used to check the situation of the vehicle bottom, to determine whether suspicious and dangerous explosives or personnel are hidden in the vehicle bottom, and whether the overall structure of the vehicle bottom has been illegally changed. It can also be used for safety inspection of the bottom of tables, chairs, beds, filing cabinets, high platforms, pipelines, shafts, pipelines, black boxes, trees and other places that are inaccessible to human bodies.

---

## Features

- Miniature wide-angle high-definition camera: With infrared night vision, the vision is broader and clearer;
- Angle adjustment: The angle of the camera can be adjusted by the remote controller.
- Two-stage folding structure: The maximum opening angle is 180 degrees for remote detection.
- High endurance: High-capacity lithium battery pack can be used for 8 hours.
- 7-inch color screen: It can display real-time monitoring images, start and play back videos, snap shots and browse photos, etc.

## Specifications

Model	ZK-M20
Operating Temperature	-20°C~+60°C
Definition	600 lines, 1/3 SONY CCD infrared image sensor, infrared night vision
Display	color 7inch
The Resolving Power Of Display	800*480 (RGB)
Working Voltage	9~12.6V
Operating Current	400mA
Power Consumption	6800mW
Battery Capacity	5200mAH
Net Weight	3.4KG
The Dimension Of Product	1020*180*280mm
The Dimension Of Package	1050*210*310mm

## Dimensions (mm)
