

SBTL520 Series

**Dual wing Barrier Turnstile
For multi-lane additional**

The SBTL520 is a single lane swing barrier turnstile series designed for smooth and silent operation and draws very little power. It's made of stainless steel which makes SBTL520 highly durable.

SBTL520 barriers are normally held in a locked position, thus denying access to the secured side. Upon SBTL520's reader (RFID and/or fingerprint) positively recognizing a user's valid access card or fingerprint, its barriers swing automatically, thus allowing users passage to the secured side.

During power outage, the user can push through the barrier easily to exit to safety. SBTL520 provides both security and convenient space, all in a very durable and elegant compact design
